

ABOUT ELECTRIC VEHICLE CHARGERS (EVC)

Electric Vehicle Chargers (EVC) is NSW's premier supplier, installer and maintenance provider of EV charger points. We specialise in the installation of AC wallbox outlets for industrial and commercial electric vehicle charging. We also provide DC charging stations for those who need a faster charging option. Both allow your business to generate a new stream of revenue.

EVC prides itself on delivering sustainable solutions to the electric vehicle energy market. We want to provide customers with access to the latest charging solutions for their electric vehicles.

Electric vehicles are part of the sustainable future of transport within Australia and at EVC, we are charging into a dynamic future.

Your Customers Are Driving EVs. Is Your Business Ready?

NEWSFLASH

Your business may be eligible for substantial Government subsidies for installing an EV charger unit. Ask us how you may benefit from these grants and other incentives.

CHARGING STATIONS THAT PAY OFF FOR YOU AND THE ENVIRONMENT

Powering sustainable electric transport and boosting your bottom line.

It's no secret that electric vehicles are becoming the norm on Australian roads with many car manufacturers mass producing plug-in hybrid electric vehicles (PHEVs) and battery only electric vehicles (BEVs). With constant improvements and developments in electric vehicle battery capacities, EVC is now providing the infrastructure for you.

What happens when you install an EV fast charging station on your premises?

- You add value to your customers' experience so they stay longer
- You generate new streams of revenue for your business as they pay you to charge the vehicle

Why use EVC?

- EVC has a full range of AC and DC charging station solutions
- EVC gives your customers mobility and peace of mind without range anxiety
- EVC charging solutions are designed to give you the maximum charge capacity within the minimum amount of time.

MAINTENANCE AND REPAIRS

We're here to help if your EV charging station needs a little boost.

Is your personal charger not working to full capacity? Worried about the output into your EV? Has your commercial charging station been damaged and needs repairing? EVC should be your first and only call.

We install many different chargers including GARO, ZAPPI and many other popular brands. We also provide maintenance and repairs on existing established applications. Our expert technicians understand the mechanics of the charging stations and can provide technical diagnostics and support so that we can get your EV charged sooner.

EVC gives EV users mobility and peace of mind. With options to charge their vehicles at your premises, you can maximise the range of your customers' vehicles, adding value to their experience and generating revenue.

We can also provide the AMI (All Maintenance Included) package, where for a percentage of your business's charging revenue, your EV charger station ownership is worry free.
